 +1 (289) 885 4056

 Waterloo, Ontario, Canada

EDUCATION

UNIVERSITY OF WATERLOO

Bachelor of Computer Science

SEP 2022 - MAY 2027

Waterloo, ON

- Specializing in Artificial Intelligence (3.7/4.0)
- Coursework: Object-Oriented Programming, Data Structures, Algorithms, Compilers, Operating Systems
- Extracurriculars: UW Blueprint Technical Lead, Data Science Club Web Developer, Varsity Figure Skating

EXPERIENCE

AMAZON WEB SERVICES

Incoming Software Developer Intern

MAY 2025- AUG 2025

Vancouver, BC

FORD PRO

Full Stack Engineer Intern

JAN 2025 - APR 2025

Oakville, ON

- Created a data migration pipeline, transferring 100,000+ company account records into a PostgreSQL database, using GraphQL to handle API interactions and Google Cloud Run for serverless execution
- Implemented a user enrollment endpoint within a Spring Boot microservice that enables companies to seamlessly register their users for Ford products, using Java and Azure IAM
- Built interactive UI components for the dashboard, providing financing analytics and currently serving 2,000+ daily active users, with React, TypeScript, and SCSS

DESCARTES SYSTEMS GROUP

Software Engineer Intern

MAY 2024 - AUG 2024

Waterloo, ON

- Migrated critical company applications from legacy frameworks to .NET Core for improved maintainability through modularizing programs and refactoring 20,000+ lines of code to adopt MVC architecture
- Engineered a robust geocoding service in C# and SQL, supporting address validation across 18 countries, by integrating multiple third-party APIs and caching frequently searched addresses in-memory to optimize performance

EON MEDIA

Machine Learning Engineer Intern

SEP 2023- DEC 2023

Toronto, ON

- Optimized a video encoding pipeline to process 20x more videos daily and convert 12,000+ hours of MP4 content into HLS playlists by leveraging AWS Lambda to execute Ffmpeg commands in parallel
- Improved brand recognition performance within an AI video processing pipeline by 25% through image augmentation and text preprocessing including polynomial curve fitting on arched logo text with OpenCV, Tesseract OCR, and SciPy.
- Deployed a Slack chatbot to deliver real-time notifications on active pipelines and control pipeline operations (start/stop) via chat commands, automating workflows and cutting manual actions by half, using Python, Slack API and AWS API Gateway
- Analyzed cost inefficiencies across several AWS resources, reducing monthly cloud expenses by over \$2,500 through implementing storage lifecycle policies with S3 Glacier, migrating to EC2 spot instances, and fine tuning Lambda functions
- Designed an autocomplete system out of an Elasticsearch database to streamline searches for brands
- Built Flask API endpoints allowing frontend teams to perform CRUD operations on video metadata

SKILLS

Languages: Python, SQL, Javascript, Typescript, C++, C#, Java, HTML, CSS

Frameworks & Tools: React, .NET Core, Flask, Spring Boot, Docker, Git, Tailwind, OpenCV, Tensorflow

Database & Cloud: AWS, Azure, Google Cloud, MS SQL, PostgreSQL, MongoDB
